

Extend Your Multipoint Reach

A natural extension to the LifeSize® Multipoint™ conferencing solution, LifeSize® Multipoint Extension™ allows organizations to easily connect remote employees and external partners to your existing video network for voice, video and data collaboration - now in High Definition.

LifeSize Multipoint Extension makes HD video communication accessible to any member of your organization. By using LifeSize Multipoint with Multipoint Extension, users can collaborate in a multi-party HD conference regardless of their device. Whether it's a high end room conferencing system, a laptop in a branch office or a teleworker's personal computer, everyone connects seamlessly.

(Connect everyone together flawlessly)

Customers and partners can also be included by simply sending a web link to the Multipoint conference. LifeSize Multipoint Extension's built-in firewall traversal ensures call connectivity regardless of your partner's firewall configuration.

LifeSize Multipoint Extension also makes it easy to record, archive and view previous Multipoint conferences. Recorded content is easy to organize, manage, and view providing a simple web-based interface.

The Advantages are Clear

Extend the Reach of your Existing Video Network

With LifeSize Multipoint Extension, any person with a laptop, webcam, and network connection can seamlessly participate in any video conference, from anywhere

Collaborate Effectively with Business Partners

LifeSize Multipoint Extension makes joining a video conference as easy as joining an audio bridge call. Simply send your business partner a meeting invite generated by Multipoint Extension's Microsoft® Outlook™ plug-in, at the time of the conference, all parties click the link inside the invite

Enjoy High Quality Video, Audio and Data on any Computer

By utilizing LifeSize's state of the art audio and video hardware processing, each participant is assured a high quality audio/visual experience, now with HD video down to the desktop

Common Experience for all Participants

Whether connected from a high end conference room or a remote laptop, all users get the same conference features like Continuous Presence video and H.239 data collaboration

Say Goodbye to Expensive Deployment Costs

LifeSize Multipoint Extension uses a freely distributable, state-of-the-art web client. There are no client software fees, complex installations, license provisioning or software upgrades

Product Specifications

LifeSize® Multipoint Extension™
